Guiding Principles in the Use of Fruit Flies

The basic aims of experiments involving Fruit Flies are to achieve an understanding of life processes and to further man's knowledge. Such experiments must be conducted with respect for life and an appreciation of humane considerations that must be afforded all Fruit Flies. To assure humane treatment of Fruit Flies, a qualified adult supervision with training in the proper care of laboratory Fruit Flies must assume responsibility for the conditions of any experiment involving live vertebrates.

Student Certification

I hereby declare that my project has followed these humane recommendations.
